

## *Fairylight Friends — Full Moon Party Activities*

### 1/ Amusement Park

In *Full Moon Party*, Ruby, Iris, and Pip follow The Moonlit Path to the Full Moon Fairy Fest! You can design your own amusement park. Draw rides and label them with names — or make a fairy roller coaster by following these steps:

#### Fairy Roller Coaster

##### What You'll Need:

- One large piece of blank paper or cardboard (like the blank side of one panel of a cereal box)
- Pre-cut 1-2" wide strips of paper (copy paper, construction paper, magazines, or other) of varying lengths — get an adult to cut these for you)
- Glue stick or white glue
- Markers or crayons (optional)

##### What to Do:

1. Fold the ends of a paper strip under, and apply a small amount of glue to each end. Next, glue the strip to a large piece of paper or cardboard base, pushing the ends of the strip together so the middle of the strip bends to make a bridge.
2. Repeat the process using another strip of paper. You can start this strip where the first strip ends, or overlap them in different ways and connect them later on. Fold each end of the paper strip once more to create a flat, raised section of “track,” or leave it curved for a bumpy ride. You can even make a loop on your roller coaster by twisting the strip and gluing down the ends.
3. Repeat the process adding more and more strips. Try weaving them over and under each other as you build. Then connect your strips to make a “track.”
4. Think of a fun theme for your roller coaster and use markers or crayons to add a name and other details to your ride.

### 2/ Can-Do List

Iris wants to ride the Flower Tower, but she's not tall enough. Have you ever wanted to do something and been told you're not big enough or old enough? Make a list of things you can do now that you couldn't do when you were younger.

### 3/ Full Moon

The Moon goes through different “phases” as it orbits the Earth about once every 28 days. The “phases” of the Moon refer to how much of the moon's surface we can see from Earth as the Sun's light is reflected by the Moon. During a “full” moon, we see the Moon as a circular shape. Research the Moon's phases and draw what the Moon looks like during each phase. Get permission to use these websites to find out more:

<https://spaceplace.nasa.gov/moon-phases/en/>

### 4/ What to Wear?

Ruby uses her magic to make fun costumes to wear for the photo booth. Design and draw your own costumes, or create them using clothing and objects from around your house. You can even include fun accessories like glasses, hats, shoes, and jewelry! (Don't forget to ask permission.)

### 5/ Make a Move

Pip's dancing was inspired by things he loves in nature: he bloomed like a flower, swayed like a tree, and twirled like a maple seed. What inspires you to dance? Think about the way things move. Put on some music and make up your own dance moves. You can even name your dances and teach them to someone else!
